MED HAT THA 2.11

6. Procedure

- 6.1. With a vehicle breakdown you should pull off the roadway as far as you possibly can. Put four-way flashers on. If possible, call for help. This is to ensure that someone knows your situation. Dress for weather conditions. Set out your emergency triangles. Then assess the situation. If there is nothing you can do to fix it call your supervisor.
- 6.2 Always let someone know your destination and the route you are taking. This will help locate you if you can't contact someone. If you can't see any farms that are close to get help from, then stay with vehicle. Someone will be dispatched to find you.
- 6.3 Do not attempt to walk for help in the cold weather, stay with the truck, it is the safest place to be.
- 6.4 When working at Foster Creek Cenovus, if you have a vehicle breakdown, follow Cenovus /CLAWR regulations. This includes having your supervisor or Cenovus Rep contacting CLAWR. It is their rule that you freeze the scene till they have investigated and allow you to have the truck moved or towed. Failure to do so may result in suspension from the Cold Lake Airforce Base.

***This is when you are off road on the ice roads, when radio calling is mandatory ***

Remember : if you are in doubt about what to do, call your Supervisor
